

Problem-Solution Fit

Date	15 July 2026
Team ID	
Project Name	A Comprehensive Measure of Well-being
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience.

1. CUSTOMER SEGMENT(S) [CS] - Government agencies - Policy makers - Researchers - Students - NGOs - Data analysts	6. CUSTOMER LIMITATIONS [CL] - Limited technical knowledge - Limited access to analytical tools - Lack of time - Difficulty interpreting HDI data	5. AVAILABLE SOLUTIONS (PROS & CONS) [AS] Manual Calculation - Pros: Accurate when done correctly. - Cons: Slow and requires calculations. Statistical Reports - Pros: Reliable source of information. - Cons: Cannot predict future HDI instantly.
2. PROBLEMS / PAINS + FREQUENCY [PR] - Manual HDI calculation is time-consuming - Difficulty in analyzing multiple socio-economic indicators - Lack of quick prediction tools - Frequently faced during research and policy planning	9. PROBLEM ROOT / CAUSE [RC] - HDI depends on multiple socio-economic indicators - Manual analysis is complex and time-consuming - No simple tool for instant HDI prediction	7. BEHAVIOR + INTENSITY [BE] - Searches online for HDI information - Uses reports and datasets - Frequently analyzes development indicators Intensity: High
3. TRIGGERS TO ACT [TR] - Need to predict a country's HDI quickly - Requirement for accurate development analysis - Academic and research purposes - Government planning and decision-making	10. YOUR SOLUTION [SL] A Comprehensive Measure of Well-being is a Machine Learning-based HDI Predictor developed using Python, Flask, and Scikit-learn. Users enter Life Expectancy, Expected Years of Schooling, Mean Years of Schooling, and GNI per Capita to instantly receive the predicted Human Development Index (HDI) score and its corresponding development category (Low, Medium, High, or Very High).	8. CHANNELS OF BEHAVIOR [CH] Online - Government websites - UNDP reports - Educational websites - Research portals
4. EMOTIONS BEFORE / AFTER [EM] Before - Confused - Frustrated - Time-consuming After - Confident - Satisfied - Informed		Offline - Universities - Government offices - Research institutions
