### Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

### Example:

| Problem Statement (PS) | I am (Customer)                                                          | I'm trying to                                                                             | But                                                                                    | Because                                                                                                                    | Which makes me feel                                       |
|------------------------|--------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------|
| PS-1                   | A policymaker, researcher, or student analyzing a country's development. | Predict the Human Development Index (HDI) accurately using key socio-economic indicators. | Calculating HDI manually and analyzing multiple factors is time-consuming and complex. | It requires processing large datasets and understanding the relationship between health, education, and income indicators. | Confused and unable to make quick, data-driven decisions. |
