Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I need an easy way to estimate a country's HDI. • I want accurate and reliable predictions. • The results should be simple to understand.	THINKS • Can Machine Learning provide accurate HDI predictions? • Which factors influence HDI the most? • Will this save time compared to manual analysis?
PERSONA NAME <i>Policy Maker / Reseacher / Student</i>	
DOES • Collects socio-economic data. • Analyzes development indicators • Uses the application to predict HDI.	FEELS • Uses the application to predict HDI. • Curious about a country's development level. • Satisfied with quick and user-friendly results.
