

Data Flow Diagram

Date	15 July 2026
Team ID	
Project Name	A Comprehensive Measure of Well-being
Maximum Marks	2 Marks

Data Flow Diagram

This diagram shows how data moves through the HDI Predictor system – between the User (external entity), the HDI Prediction System (process), and the datastores that hold the trained model and the prediction results.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Customer, Payment Gateway).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Order).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., Customer Database, Inventory).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

HDI Predictor – Data Flow Diagram

The diagram below shows the flow of HDI input values from the User to the Prediction System, which reads the trained model from the dataset, computes the HDI score, stores the result, and returns the prediction back to the User.
