

Project Executable Files

Date	15 July 2026
Team ID	
Project Name	A Comprehensive Measure of Well-being
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
A-Comprehensive-Measure-of-Well-Being/
|-- dataset/
|   |-- hdi_dataset.csv
|-- models/
|   |-- hdi_model.pkl
|-- notebooks/
|   |-- HDI_Analysis.ipynb
|-- screenshots/
|   |-- home_page.png
|   |-- medium_prediction.png
|   |-- very_high_prediction.png
|-- static/
|   |-- css/
|       |-- style.css
|-- templates/
|   |-- index.html
|   |-- result.html
|-- app.py
|-- train_model.py
|-- README.md
|-- requirements.txt
|-- .gitignore
|-- LICENSE
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not Deployed
Login Credentials (Demo)	Not Applicable
Platform / Hosting Provider	Local Flask Application
Repository Link	https://github.com/sushma-boya/A-Comprehensive-Measure-of-Well-Being
Demo Video Link	https://drive.google.com/file/d/1uh9acaNL-87hRQs6zDU2iZKrQBNdAmbL/view?usp=drive_link

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. Clone the GitHub repository.

```
git clone https://github.com/sushma-boya/A-Comprehensive-Measure-of-Well-Being.git
```

2. Open the project folder.

```
cd A-Comprehensive-Measure-of-Well-Being
```

3. Install the required dependencies.

```
pip install -r requirements.txt
```

4. Start the Flask application.

```
python app.py
```

5. Open your browser and visit:

```
http://127.0.0.1:5000
```

6. Enter the following inputs:

- Life Expectancy at Birth
- Expected Years of Schooling
- Mean Years of Schooling
- Gross National Income (GNI) per Capita

7. Click Predict.

8. View the predicted Human Development Index (HDI) score and its corresponding development category.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	The application is not deployed online.	Run the project locally using Flask (python app.py).
2	The model is trained on a static HDI dataset.	Retrain the model with updated datasets when new data becomes available.
3	The prediction model currently uses four socio-economic indicators only.	Additional features and advanced machine learning models can be incorporated in future versions.
